Question Bank of OOP

Question No.	Question Text	Module Number	CO mapping	Marks
1.	Discuss the major features of OOP?	1	1	5
2.	Compare between procedural language features and OOP ?	1	1	5
3.	What are the major and minor elements for OOP?	1	1	5
4.	What is Object based & Object Oriented programming What do you mean by entity?	1	1	3+2
5	What are the advantages of modeling and why do we model?	1	1	3+2
6.	Discuss the concept of different types of modeling techniques	1	1	5
7.	Discuss the concept of class diagram and object diagram. What is link?	1	1	3+2
8.	Discuss the concept of association aggregation with example?	1	1	2.5+2.5
9.	What is multiplicity of an association? State its different types	1	1	2+3
10.	What is link attributes? State the names of different types of aggregations	1	1	2+3
11.	Discuss the compilation and execution of a java program with commands?	1	1	5
12.	What are the roles of JDK and JVM? Discuss this in terms of java architecture	1	1	5
13.	Discuss the concept of call by value and call by reference for a java program.	1	1	5
14.	Discuss how objects are created in a java program with an example	1	1	5
15.	Discuss the concept of static methods in java? What is static block?	1	1	3+2
16.	Discuss the concept of method overloading. What do you mean by this keyword in java?	1	1	2+3
17.	Discuss the concept of garbage collection in java. What is constructor in a java prog.? Discuss with an example	1	1	2+3
18.	Mention how string objects are created in java? Mention the functionalities of the following string class methods in java. (i) int length() (ii) boolean equals(String str) (iii) char CharAt(int index)	1	1	2+3
19.	Discuss the idea of command line arguments in java with a sample program code.	1	1	5
20.	Briefly discuss various types of nested classes available in java.	1	1	5
21	What do you mean by inheritance in java? Mention the name of different types of inheritance that are applicable in java	2	2	2+3
22	Discuss how parent class constructor is called from the child class constructor in java with suitable example	2	2	5
23	(a) What are the members that are not inherited in java? (b) Discuss the use of super keyword in java with an example	2	2	2+3
24.	(a) Mention two keywords that are be used to prevent inheritance. (b) What is the difference between method overloading & overriding??	2	2	2+3
25.	What are the difference between early biding & late binding? Give example	2	2	5
26.	Discuss the concept of abstract class in java with an example	2	2	5
27.	Discuss the concept of interface in java with an example	2	2	5
28.	Is it possible to inherit both abstract class and interface within a single implementing class			
29.	Comment on the object sizes for both superclass and subclass version. Give example to justify your answer	2	2	5
30.	Mention the differences between abstract class & interface	2	2	5
31.	Write a java program to demonstrate the keyboard input scenario.	1	1	5
